

FCD-155E

STM-1/OC-3 Add/Drop Multiplexer

STM-1/OC-3
add/drop multiplexer
that transports LAN
and traditional (TDM)
traffic over
SDH/SONET networks

- STM-1/OC-3 PDH/Ethernet add/drop multiplexer for grooming LAN and legacy (TDM) traffic over SDH/SONET networks
- Ethernet traffic mapped to 1 VC-3/VC-4/STS-1, up to 3 VC-3/STS-1, up to 63 VC-12 or 84 VT-1.5
- 1+1 MSP/APS redundancy
- PDH interface for 8 or 21 E1 (G.703), 8 or 28 T1 (G.703), 1 E3/T3, or 1 E3/T3 with 21/28 E1/T1 ports
- 10/100BaseT and GbE Ethernet interfaces with VLAN support and point-to-multipoint switching capability

FCD-155E is an STM-1/OC-3 add/drop multiplexer that transports LAN and traditional (TDM) traffic over SDH/SONET networks. When bandwidth granularity of the Ethernet channel is configured to 2 Mbps (VC-12) or 1.5 Mbps (VT-1.5), FCD-155E utilizes the SDH/SONET infrastructure for cost-effective connectivity.

Optional PDH interface modules include:

- 8- or 21-port E1
- 8- or 28-port T1
- Single-port E3/T3
- Single-port E3 with 21-port E1
- Single-port T3 with 21-port E1 or 28-port T1.

FCD-155E

STM-1/OC-3 Add/Drop Multiplexer

Optional Ethernet interface configurations include:

- 2-port bridging 10/100BaseT
- 6-port 10/100BaseT (two bridging and four transparent ports)
- Single-port Ethernet 10/100/1000BaseT (RJ-45) or 1000BaseSX (SFP interface).

NETWORK INTERFACE

The STM-1/OC-3 interfaces are user-configurable and provide a high-quality and high-availability link, as well as performance monitoring of the traffic path.

The STM-1/OC-3 link is supplied with an SFP socket (see *Ordering*). It is strongly recommended to order this device with **original RAD SFPs installed**. This will ensure that prior to shipping, RAD has performed comprehensive functional quality tests on the entire assembled unit, including the SFP devices. RAD cannot guarantee full compliance to product specifications for units using non-RAD SFPs.

The user can define the following SDH/SONET clock sources:

- Internal
- Recovered from the STM-1/OC-3 interface, including automatic selection based on SSM (Synchronization Status Messaging)

- External E1
- Station clock.

FCD-155E features an optional ADM configuration mechanism with SNCP path protection.

Optional 1+1 link protection mechanism (unidirectional MSP/APS) and SNCP path protection are also available.

Maintenance capabilities include user-activated local loopbacks and remote loopbacks on the STM-1/OC-3 main link and PDH tributaries.

LAN INTERFACE

The 2-port 10/100BaseT or single-port Gigabit Ethernet interfaces include a built-in Ethernet bridge that supports VLAN according to IEEE 802.1Q and 802.1p.

The 4-port transparent LAN extension, without bridge functionality, creates total separation between customers, for security. The maximum frame length is 2 kB.

The 10/100BaseT LAN interface features autonegotiation for plug-and-play Ethernet connectivity and complies to IEEE 802.3/Ethernet V.2 standards. The interface also features VLAN stacking.

An optional Gigabit Ethernet port connects one LAN port to eight virtual groups. This option provides LAN extension over SDH/SONET networks with bridge functionality. The maximum frame length is 2 kB.

Ethernet traffic is mapped into SDH/SONET containers using VCAT and encapsulated with:

- Generic Framing Procedure (ITU-T G.7041, ANSI T1-105.02), framed mode
- Link Access Procedure for SDH/SONET (LAPS) protocols following draft recommendation ITU-T X.85/X.86.

Each user's Ethernet traffic can be mapped into SDH/SONET virtual containers in any of the following ways:

- Up to 63 × VC-12, or 84 × VT-1.5
- 3 × VC-3/STS-1
- 1 × VC-4.

Ethernet traffic can be switched to different bundles of virtually concatenated VCs (up to 8 bundles) according to a predefined group.

Link Capacity Adjustment Scheme (LCAS) is supported in compliance with the G.7042 standard, which allocates bandwidth according to Ethernet traffic.

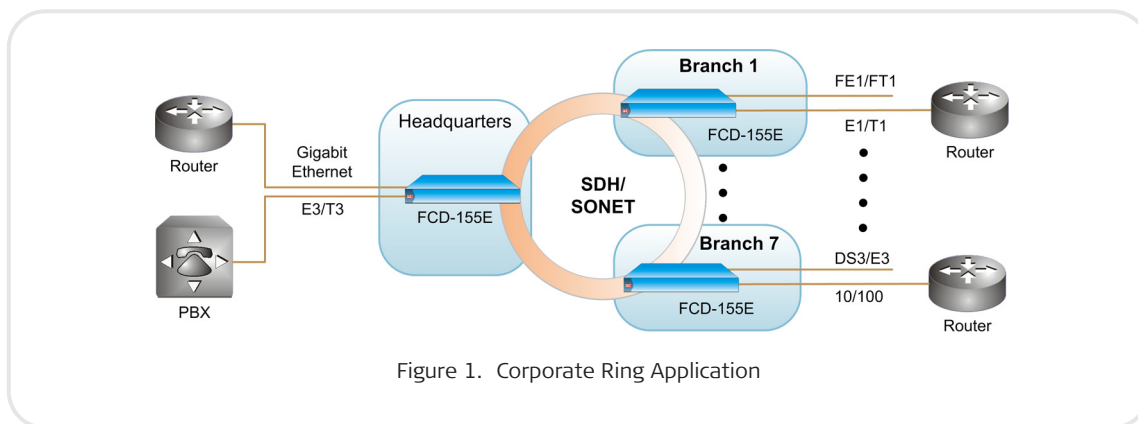

Figure 1. Corporate Ring Application

SDH/SONET media can transport basic Ethernet packets of up to 1536 bytes enabling connection to MPLS networks.

The Spanning Tree Protocol (STP) and Rapid Spanning Tree Protocol (RSTP) support Layer 2 ring applications.

TDM INTERFACES

FCD-155E has an optional interface module consisting of 8 or 21 balanced E1 or 8 or 28 T1 ports that transfer transparent data in compliance with G.703. The unbalanced E1 interface is software-selectable.

An optional E3/T3 interface module transports unframed E3/T3 data over SDH/SONET.

Another optional interface module combines E3 or T3 with 21 E1 ports, or T3 with 28 T1 ports.

TDM traffic is mapped into SDH/SONET VC-12/VC-11/VC-3 or SONET VT1.5/STS-1 containers that can be placed anywhere within the STM-1/OC-3 bandwidth.

MANAGEMENT

Remote units can be managed in the following ways:

- Via DCC using IP tunneling over OSI DCN based on ITU-T G.7712
- Via DCC based on IP/PPP protocols
- Via a dedicated virtual group containing at least one VC-12/VT-1.5 channel
- Inside the user traffic in a virtual group, separated from the user traffic by the GFP Channel ID or VLAN tag
- Out-of-band, via direct connection to one of the LAN ports.

Status and diagnostic information is defined, configured, and monitored using one of the following methods:

- ASCII terminal connected to the V.24/RS-232 control port
- Telnet host via management platform or LAN port
- Network management station running RADview, the RAD SNMP network management application

- TFTP applications to update software and upload/download remote configurations
- Web Based element manager.

DIAGNOSTICS

FCD-155E has comprehensive diagnostic capabilities, including:

- Ethernet and SDH/SONET link monitoring
- Real-time alarms to alert the user of fault conditions. Alarms are reported to the management station and simultaneously relayed through a dry contact port.

GENERAL

AC or DC power supplies are provided with an alarm-activated fan for forced-air cooling. They are available in redundant and mixed AC/DC power supply configurations.

FCD-155E is a compact 1U high 19-inch unit that can be mounted in a 19-inch rack with the optional rack-mount kit (see *Ordering*).

2 BNC female

Timing

Source clock is recovered from the receive signal from the remote E3/T3 side

Locked to the SDH/SONET interface clock

MANAGEMENT PORTS

CONTROL Port

Interface: V.24/RS-232

Connector: 9-pin D-type, female

Format: Asynchronous

Baud rate: 0.3–115.2 kbps

Selectable word format: 7 or 8 bits, no parity, 7 bit odd or even parity

Out-of-Band Access

Single Ethernet port FCD-155E version:
NG ETH port

Other FCD-155E versions:

ETH 1 and ETH 2 ports (through internal Ethernet switch)

INDICATORS

General

PWR (green) – Power

TST (yellow) – Test

MAJ ALM (red) – Major alarm

MIN ALM (red) – Minor alarm

LOC SYNC LOSS (red) – Local loss of synchronization on the STM-1/OC-3 links

REM SYNC LOSS (red) – Remote loss of synchronization on the STM-1/OC-3 links

ETH, MNG, GbE (per port)

LINK (green) – LAN link integrity

ACT (yellow) – LAN data activity

E1/T1 PDH Interface (per port)

LOS (red) – Link signal loss

AIS (red) – Alarm indication signal on link

E3/T3 PDH Interface

LOS (red) – E3/T3 link signal loss

STM-1/OC-3 Main Links

LOS (red) – STM-1/OC-3 link signal loss

ON LINE (green) – STM-1/OC-3 link is active (indicator is on) or standby (indicator is blinking)

Station Clock

ON (green) – Station clock port is connected

LOS (red) – Station clock signal loss

GENERAL

Power

100 to 240 VAC ±10%, 50 to 60 Hz

–48 VDC (–40 to –72 VDC)

+24VDC

Power Consumption

30W

Alarms

Last 100 alarms are time stamped, stored, and available for retrieval

Alarm Relay Port

Operation: normally open, normally closed, using different pins

Connector: 9-pin, D-type, female

Physical

Height: 4.4 cm (1.7 in)

Width: 44.0 cm (17.3 in)

Depth: 25.4 cm (10.0 in)

Weight: 4.1 kg (9.0 lb)

Environment

Temperature: -10° to 70°C (14° to 158°F)

Humidity: Up to 90%, non-condensing

Ordering

FCD-155E/*/&/S

STM-1/OC-3 Add/Drop Multiplexer

Notes: SFP transceivers are not included in the chassis for the uplink and/or the fiber GbE interfaces (see SFP Transceivers).

The unit can come with E3/T3 and 21E1/28T1 installed together.

To manage the unit with IP tunneling, order FCD-155-PACK1 separately.

Legend

* Power supply:

AC 100 to 240 VAC

48 –48 VDC

ACR redundant AC power supply

48R redundant DC power supply

SFP TRANSCEIVERS

(For redundancy, order two SFP transceivers)

STM-1/OC-3 Uplink

- SFP-1** STM-1/OC-3, 1310 nm multimode LED, LC connector
- SFP-2** STM-1/OC-3, 1310 nm single mode laser (S1.1), LC connector
- SFP-3** STM-1/OC-3, 1310 nm, single mode laser, long haul (L1.1), LC connector
- SFP-4** STM-1/OC-3, 1550 nm single mode laser, long haul (L1.2), LC connector
- SFP-11** STM-1/OC-3, electrical interface, mini-BNC coaxial connector
- SFP-18a** STM-1/OC-3, Tx - 1310, Rx - 1550, 9/125 single mode (single fiber), laser (WDM), LC connector
- SFP-18b** STM-1/OC-3, Tx - 1550, Rx - 1310, 9/125 single mode (single fiber), laser (WDM), LC connector
- SFP-19a** STM-1/OC-3, Tx - 1490, Rx - 1570, 9/125 single mode (single fiber), laser (WDM), LC connector
- SFP-19b** STM-1/OC-3, Tx - 1570, Rx - 1490, 9/125 single mode (single fiber), laser (WDM), LC connector

GbE User

- SFP-5** GbE, 850 nm multimode VCSEL
- SFP-6** GbE, 1310 nm single mode laser (LX-SM)
- SFP-7** GbE, 1550 nm single mode laser, long haul LX-H (ZX)
- SFP-8D** GbE, 1310 nm single mode laser, long haul (LX-H)

*Note: It is strongly recommended to order this device with **original RAD SFPs installed**. This will ensure that prior to shipping, RAD has performed comprehensive functional quality tests on the entire assembled unit, including the SFP devices. RAD cannot guarantee full compliance to product specifications for units using non-RAD SFPs.*

SUPPLIED ACCESSORIES

CBL-SMB-BNC/M/E

Cable for adapting two mini-BNC connectors to full sized BNC connectors (supplied with SFP-11)

RM-34

Hardware for mounting one unit in a 19-inch rack

AC power cord (when AC power supply is ordered)

DC adapter plug (when DC power supply is ordered)

OPTIONAL ACCESSORIES

CBL-DB9F-DB9M-STR

Control port cable

FCD-155E-PS/AC

100-240 VAC power supply module

FCD-155E-PS/48

-48 VDC power supply module

CBL-G703-8/^

8E1/8T1 interface cables for the DB-44 connector (one cable required per interface):

Legend

- ^** Connector type:
- RJ45** splits into 8 E1/T1 balanced RJ-45 connectors
- RJ45/X** splits into 8 E1/T1 balanced RJ-45 connectors (cross-cable)
- COAX** splits into 8 pairs of E1 unbalanced BNC male connectors
- OPEN** 8 × 4 unterminated free leads, 2m (6.6 ft)

CBL-G703-14/#

14E1/14T1 interface cable for the DB-62 port connector

CBL-G703-28/#

Two CBL-G703-14/# interface cables for the DB-62 port connector, to provide 21E1/28T1 capacity

Legend

- #** Connector type:
- RJ45** splits into 14 E1/T1 balanced RJ-45 connectors
- COAX** splits into 14 pairs of E1 unbalanced BNC male connectors
- OPEN** 14 × 4 unterminated free leads 2m (6.6 ft)
- PATCH** for connection to 2 Telco connectors, 2m (6.6 ft)
